Termly Plan for

Foundation Phase Parents

Year 1 and 2 Classes:

Miss Manon Davies

Miss Fflur Davies

Summer Term 2025

The Four Purposes

The New Curriculum for Wales will be giving the children the foundation they need to succeed in the changing world. The New Curriculum helps young people to be more adaptable and motivated to keep learning new skills as life and the world changes around them,

The aim is to support children and young people to be:

- *ambitious, capable learners*
- *enterprising, creative contributors*
- *healthy confident individuals*
- *ethical, informed citizens*

These aspects will take a prominent place in our plans and we are eager and confident that we can nurture these skills in our children.

If you would like further information, please do not hesitate to contact your child's teacher.

Theme: Away we go around the World on The Magic Carpet!

We look forward to exploring aspects of the New Curriculum as we go on and adventure around the World on the Magic Carpet!

The Six Learning Areas:

Health and Wellbeing: Our theme provides the opportunity to learn about the different cultures of the world and compare them with ours. We look forward to learning about Fair Trade and the journey of foods such as bananas and chocolate. We'll be learning about Africa and how we could help others who are less fortunate. In P.E. we will be focusing on fitness, ball skills and athletics this term. Our Happy Minds sessions will be focusing on engaging with others.

Language, Literacy and Communication: We will be encouraging and promoting the use of Welsh and developing the children's oracy skills in a range of activities, including singing and role play such as an airport. Learning different words and phrases in different languages will be lots of fun as we learn about different countries! We'll use different Phonics Plans such as Tric a Chlic to develop reading skills as well as developing higher-order reading skills with some children.

Entering the children's world of imagination is so important to us as a way of inspiring their writing, and our imaginary trips to France, America and Japan for example are sure to promote creative and factual writing. There will be plenty of opportunities to experiment with different writing genres such as a postcard, pamphlet and an information poster.

Mathematics and Numeracy: Our focus will be on skills such as counting in sets, multiplication, fractions, capacity, time and temperature. We will seek opportunities for the children to learn by working practically, through cross-curricular experiences and play; be that through water experiments or measuring Taj Mahal they've built!

Expressive Arts: There will be an opportunity for the children to learn different languages as we'll be singing various international songs. We'll be using instruments to follow different rhythms, such as African and French music. The children will have opportunities to explore their creativity as they design and create a range of artifacts and imitate the work of famous artists such as Monet and create models of American buildings.

Science and Technology: We will entice the children's curiosity and harness their skills to learn independently in different activities and research such as using tools to build cars and an inquiry on robots. We'll apply the skills of the Digital Competence Framework by collecting data, coding and learning about internet safety.

Humanities: We look forward to learning and appreciating the wonders of the world as we go on our magic carpet ride. We will learn about different religions and celebrate all kinds of cultures in countries such as Africa, America, South Korea and Thailand. Outdoor learning in the Forest School will offer us valuable cross-curricular learning experiences, and we will also be focusing our intentions on planting and growing outside this term.
