Termly Plan for Parents

Year 1 and 2 Classes:

Miss Davies
Mrs Rowlands

Autumn/Christmas 2024 Term

The Four Purposes

The New Curriculum for Wales will be giving the children the foundation they need to succeed in the changing world. The New Curriculum helps young people to be more adaptable and motivated to keep learning new skills as life and the world changes around them,

The aim is to support children and young people to be:

- ambitious, capable learners
- enterprising, creative contributors
- healthy confident individuals
- ethical, informed citizens

These aspects will take a prominent place in our plans and we are eager and confident that we can nurture these skills in our children.

If you would like further information, please do not hesitate to contact your child's teacher.

Theme: On my doorstep

We look forward to teaching aspects of the New Curriculum as we go on an adventure around our local area!

The Six Learning Areas:

Health and Wellbeing: The children's health and wellbeing will be at the heart of our plans this term. We will be giving attention to developing the children's confidence, their ability to form new friendships, listening skills and working together. During circle time sessions, we will be encouraging the children to understand and express their feelings and emotions. Yard games and ball skills will be the content of our P. E. lessons this term, focusing specifically on Football and Rugby.

Language, Literacy and Communication: There is no better feeling than seeing the children learning the Welsh language and falling in love with its culture. We promote this through a variety of activities from singing to learning weekly Welsh phrases. We use phonic programmes such as 'Tric a Chlic' to develop the children's reading skills and we give higher-order reading tasks. Going into the children's imaginative world is very important to us to stimulate them to write and we take every opportunity for the children to use different writing forms and working cross curricular in thematic work e.g. write a file of facts about famous people the local area, create thank you cards to show appreciation to local people and create a pamphlet based on Wrexham. also teach the children to communicate through Makaton.

Mathematics and Numeracy: We will be concentrating on developing the children's recognition and understanding the value of numbers, sequencing numbers and adding and subtracting this term. We will be taking advantage of every opportunity for the children to work practically, cross-curricular and to learn through play; from handling money in the 'shop' to measuring 'Erddig' they've created in the construction area!

Expressive Arts: As the saying goes; 'singing feeds the soul' and we will be learning thematic and seasonal songs. We will have the opportunity to respond creatively to the poems of the poet I.D. Hooson and sing the song 'Band Un Dyn' using instruments. We will listen and respond to the performances of local artists such as the pianist Llyr Williams.

Science and Technology: We will ignite the children's curiosity and nurture their ability to learn independently through a variety of exciting activities, investigations and experiments. We're sure they will be lots of fun as the children learn how to create bubbles! We will apply the skills of the Digital Competence Framework by using the Chatterpix app, and coding work by moving a Beebot on a map of Rhos.

Humanities: We look forward to learning about the history of our local area, who I. D Hooson was, and learning about iconic buildings such as the Stiwt, Erddig and the Racecourse in Wrexham. We will take every opportunity to learn outdoors learning about the changes in the world around us during the Autumn season.
